

# Training Workshop

## Hazard Assessment and Control Measures

Hazard Assessment and Control Measures play an important role in business success

The health & safety regulations place a much stronger emphasis on hazard assessment as a core element of health and safety management.

This interactive training session will provide the necessary tools to identify hazards and apply an effective qualitative rating system as well to ensure the controls are adequate.

- Duration: Four (4) hours.
- Maximum number of participants: 15
- Location: Designated company site

### Objectives

After completion the training, the participant will be able to:

- be familiar with the terminology related to Hazard Assessment and Control Measures
- identify hazards
- rank hazards qualitatively
- identify appropriate controls to progressively reduce risks
- recommend and implement control measures

### Materials

- All Participants will receive comprehensive guide, which is an excellent source of reference.

### Who should attend?

- Health & Safety Supervisors, Coordinators and Managers
- Production & Maintenance Supervisors, Operators, Workers and Managers

### Fee
